# WOOD FIRES

## 2024

[masportheating.co.nz](https://masportheating.co.nz)

## Masport Heating – proudly made in New Zealand.

Superior build quality, extensive research and development, rigorous quality control and a guarantee of workmanship are values that are synonymous with Masport Heating. The brand is part of the Glen Dimplex Group, the largest manufacturer of wood fires in Australasia, allowing Masport to bring an extensive product range to market that offers great value for money.

Masport Heating is committed to producing the best wood fires in New Zealand. Our confidence is reflected in the 10-year fire box warranty on the entire LEB & Rural wood fire range, 15 years on non-catalytic and 20 years on catalytic fire box warranty on the ULEB range. We hold operational spare parts, available for purchase, for 15 years from the last date of manufacture for all models. So you can rest assured that you are buying a quality, New Zealand made product from a reliable and renowned wood fire manufacturer.

**For more information, please view our latest range of products on offer in this brochure or visit our website [www.masportheating.co.nz](http://www.masportheating.co.nz).**

# Why buy a Masport?

**We've been heating New Zealand homes for almost 40 years.**

All Masport fires are built in New Zealand for New Zealanders. We pride ourselves on supporting the local economy and keeping jobs in the country. Making a Masport wood fire is a team effort. We buy New Zealand-made steel that is cut, crafted, welded, and assembled by our team of over 70 Kiwis. This local knowledge and expertise mean that we can keep your home and your family warm over the winter period. Our dedicated and passionate staff have centuries of experience in the wood fire industry and love bringing exciting new products to market each year.

**Masport Heating has been helping New Zealanders simplify the process of bringing home the comforting warmth and ambience that only a wood fire can provide.**

## Is a wood fire the best option for me?

**Choosing which wood fire to install in the home is an important decision that should be based on the actual warmth you will feel and need in the home. After all, it's that unmistakable cozy, warm and homely feeling only a wood fire can bring that we all want in the first place.**

**At Masport Heating we want to provide customers with trustworthy and reliable information based on data that reflects 'real world' situations and usage for the New Zealand homes that they live in.**

- ▶ **Versatility** – A wood fire has a multi-purpose function which, apart from being your primary heat source, can be used in conjunction with a heat transfer system, hot water heating, and cooking during power failure.
- ▶ **Sustainable** – Wood is a carbon-neutral product, and unlike other fuels, burning wood generates no more carbon dioxide(CO<sub>2</sub>) than if it was left to decompose naturally. Wood is also a renewable energy source making it a sound environmental choice.
- ▶ **Quality** – with **10 to 20-year firebox warranties available on products across the range**, a Masport wood heater is a long-term, reliable heating solution. Plus, Masport holds operational spare parts for 15 years from the last manufacture; this gives you peace of mind and knowledge that you can service your wood fire over its lifetime.
- ▶ **Options** – with styles and sizes to suit every home, you can select a model that will warm your home and become a design feature of any room.

1. Space Heat Output is only a guide based on homes with average insulation, window areas, and 2.4m ceiling heights. Differences in these factors, as well as others like, geographical location, layout of the house, living room size, type of windows all play a part in choosing the right model for your heating needs. Consult your dealer or installation contractor for more information.
2. Extended burn time: It is possible to achieve an extended burn time, when using a mixture of pine and hardwood. The burn period may vary due to factors such as moisture, density of fuel, environmental factors and how the unit is operated.
3. Maximum average output is kW output as per NES test AS/NZS 4012:2014. This kW rating reflects the real world usage of any fire and can be found on the official compliance plate on the fire or on the BeReal tag.
4. Certain air sheds in these regions of New Zealand have more stringent rules than NES. Consult your Masport dealer or local council for specific rules applicable for your location.

\*Conditions apply - Refer to product page for details.

Masport Heating recommends that all installation and service work of any wood fire, bakers oven or outdoor fire be carried out by an installer who has completed the certification programme authorised by New Zealand Home Heating Association (NZHHA).

Logo	Compliance	Minimum Performance Required	Efficiency %	Emissions g/kg	Emissions mg/MJ
	NES	Complies to National Environment Standards set by Ministry for the Environment for use in all New Zealand regions. Exception apply to some airsheds in some of the regions.	65	1.5	
	ULEB - ECan & Nelson	Complies to the stricter Environment Canterbury & Nelson region's ULEB emission standards which requires testing to CM1.6 method.	65	1.5	38
	ECan <sup>^</sup>	ECan <sup>^</sup> - Areas of Environment Canterbury region where ULEB regulation is not applicable e.g. areas of Selwyn, Geraldine district councils and areas outside main ULEB airsheds.	65	1.0	
	BOPRC	Complies to the more stringent Bay of Plenty Regional Council's emission standards for the Rotorua airshed.	65	0.6	
	ORC1	Complies to the more stringent Otago Regional Council's emission standards for Airshed 1 comprised of Arrowtown, Cromwell, Clyde and Alexandra.	65	0.7	
	Hawke's Bay	Complies to the more stringent Hastings Regional Council's emission standards for the Hastings Zone 1 airshed.	65	1.0	
	Rural	Rural fires can only be installed on a section of two hectares or larger. Check with your council for clarification on local restrictions. ULEB & LEBs can be installed on rural properties.			

# Future proofing with Masport wood fires

**At Masport Heating, we want to do what is right for the environment. Whether it is using energy more efficiently or improving our air quality, we want a cleaner, greener Aotearoa.**

Our new Ultra Low Emission Burners (ULEBs) are engineered to do just that.

Masport, using its vast experience and resources, is committed to developing and exploring different combustion techniques to deliver ULEBs based on and around the new real-life test, and fuel sourced from your local wood merchant.

As New Zealand continues to refine regulations to protect our natural environment, the Masport ULEBs are designed to exceed the most stringent air quality emission standards whilst giving a longer burn periods seen in some conventional wood fires currently available in the market.

## Producing a cleaner, better Fire

Ultra M3 technology incorporates a fusion of 3 key features to elevate the performance, clean burning, safety and lower maintenance costs.

### Masport M3 Box Baffle

The Ultra M3 design outperforms traditional baffles, ensuring cleaner burns. By superheating secondary air in the firebox, it achieves ultra-clean combustion. Constructed from Stainless Steel, Masport M3 Box Baffles are more durable, reducing the need for frequent replacements and lowering running costs. They are also less prone to environmental issues.

### Masport M3 Starter Latch

The Masport M3 Starter latch is a simple yet effective safety solution that enhances fire operation. By allowing the door to be positioned slightly ajar, it facilitates easy ignition by allowing air to enter the firebox. It also ensures better ventilation when the fire is not in use.

### Masport M3 Ceramic Brick

Featuring a higher thermal mass, Masport M3 Ceramic Bricks release stored heat towards the end of the burn cycle, ensuring more consistent heat output. They are also more resilient, resulting in longer lifespan and reduced replacement needs.

### The choice is easy

Cleaner air, lower operating costs, more comfortable rooms, and all with an extended burn. Made in New Zealand and suitable for all regions, we believe Masport ULEBs are the future of wood fires.

**Future proof your purchase to protect the New Zealand natural environment.**

## Ultra-Low Emission Burners (ULEB)

### Our Next Generation Technology

All fires are not created equal, when it comes to their impact on the environment, the difference can be significant. The emissions from Masport's latest range of clean-burning wood fires are lower than ever.

Our Ultra-Low Emission Burners (ULEBs) are among the cleanest solid fuel burners available and meet all of New Zealand's strictest environmental standards. They are also designed to deliver powerful and lasting warmth, with some models even able to heat your home overnight.

# FREESTANDING RURAL WOOD FIRES

[masportheating.co.nz](http://masportheating.co.nz)

## Rural fires are capable of a comprehensive extended burn time\*, making them an all-in-one multi-purpose appliance that offers great value for money.

Rural fires can only be installed on a section of two hectares or larger. Contact your council for clarification on local restrictions. Masport wood fires also have an extensive range of clean air wood fires, visit our website for more information.

<sup>1</sup> Heat output and burn time will vary depending on fuel size, type and moisture content.

<sup>2</sup> These models have a cooktop ability. Please ensure cookware is used and food is not put directly on the wood fire surface. Over time cooking on your wood fire may alter the appearance, this is not covered under warranty.

<sup>3</sup> These models have been safety tested for ALCOVE configuration, i.e., recessed installation with walls on two sides. The ceiling height of the alcove must be 2.4m. The clearances may vary compared to the clearances shown in the above table. Refer to detailed specifications that come with the fire or Masport website.

Space Heat Output is only a guide based on homes with average insulation, window areas, and 2.4m ceiling heights. Differences in these factors, as well as others like, geographical location, layout of the house, living room size, type of windows all play a part in choosing the right model for your heating needs. Consult your dealer or installation contractor for more information.

### Type of Fires

- ✦ Radiant Fire
- ✦ Convection Fire

### Type of Flue Shields

MDS	Masport Double Skin Flue Shield 1200mm long	GDFLU012M
MDSM	Masport Double Skin Flue Shield 900mm long with special heat diverter and ceiling plate	GDFLU013M
MDSS	Masport Double Skin Flue Shield 600mm long	GDFLU018M

### Type of Floor Protectors

AFP	Ash Floor Protector
IFP-12	Floor Protector with 12mm non-combustible material
IFP-15	Floor Protector with 15mm non-combustible material

### Notes

- ▶ Water heating booster tubes can be fitted to Masport wood fires but the local emission regulations in some areas may preclude their use on some models.
- ▶ It is important to note that this dimension page is a guide only. Please refer to the installation manual supplied with the fire for accurate manufacturer recommendations. All details are available on [www.masportheating.co.nz](http://www.masportheating.co.nz)
- ▶ Clearances are for fire hazard only. For durability of finishes or surfaces you should contact the relevant manufacturer for their specification. Glen Dimplex New Zealand Ltd accepts no responsibility for the deterioration of surfaces or finishes.
- ▶ For full warranty details refer to your owner's manual. All heaters must be installed and serviced by an authorised installer. Due to ongoing enhancements, specifications may change without notice. Some pictures and settings are for illustration purpose only. Contact your dealer for fires available in your area.

# Matakana 1200

## OUTDOOR WOOD FIRE

An ever increasing demand for outdoor living spaces, and the importance of bringing people together whilst creating a welcoming outdoor setting, has inspired Masport Heating to create the **Matakana**.

Drawing inspiration from one of New Zealand's popular getaway spots for locals and visitors alike, the **Matakana 1200 Outdoor Fire** represents a picturesque region known for its farmers' market, boutique food and spectacular vineyards - a foodie's haven.

With an impressive 1.2m width, the **Matakana** not only offers the warmth of an open fire but also cooking facilities on its cast iron hot plate and grill or its substantial pizza oven where 3 × 300mm pizzas can be cooked at any given time.

- ▶ High Quality New Zealand, 4mm steel firebox
- ▶ Stainless steel runners for 6 cooking heights
- ▶ Removable spark guard door
- ▶ Stainless steel weather shield for protection against the elements
- ▶ In-built pizza oven
- ▶ Cast iron hot plate and grill
- ▶ Storage area for cooking tray
- ▶ Free accessories
  - ▶ Pizza paddle
  - ▶ Heat resistant gloves
- ▶ Suitable for masonry and timber framed Zero Clearance (ZC) recessed installations
- ▶ 5 Year firebox warranty\*

▶ Cast Iron Cooking Plate and Grill

▶ Cooking Tray Storage Area

▶ Pizza Oven with 3x Pizza Stones

\*Refer to the owner manual for detailed terms and conditions of the product warranty.

# Matakana Outdoor Freestanding Package

## OUTDOOR WOOD FIRE

Meet the outdoor entertainer's dream, the Matakana Outdoor Wood fire - complete with architecturally designed corten cabinet which weathers artfully over time to produce a rusted patina. This not only looks stunning, but protects the structure and integrity of the fire itself.

The Matakana will create a perfect outdoor setting for your next gathering with removable cast-iron grill plates for generous cooking capacity, plus the in-built pizza oven caters to three large 30cm (12 inches) bases.

Relax and enjoy nature's greatest TV with the extra wide 1160mm viewing window, complemented by minimalist framing and subtle black detailing. Matakana Outdoor Freestanding Suite is low maintenance yet hard-wearing, with a high-quality steel firebox and stainless steel flue (optional) for optimal durability.

- ▶ Heavy-duty and robust cabinet construction
- ▶ Easy, hassle-free installation
- ▶ Convenient wood storage
- ▶ Suitable for both urban & rural outdoor settings including coastal areas

#### Included within pack:

- ▶ Matakana outdoor firebox
- ▶ Corten cabinet\*
- ▶ Weather shield cover
- ▶ Spark guard door
- ▶ Cast-iron cooking grill and plate
- ▶ Pizza paddle
- ▶ Heat resistant gloves
- ▶ Stainless Steel, Painted Flue Kit (Optional)

#### Construction

Cabinet 3mm thick Corten Steel  
Flue Kit Stainless Steel

Finish Metallic Black VHT

Dimensions Cabinet — 1506 x 656 x 1835/1905mm\*  
w x h x d (\*up to spigot)

Optional Flue Kit includes Main flue pipe — 1.5m long 300mm Dia  
Outer casing — 1.2m long 400mm Dia  
Includes necessary brackets,  
Rain cap and anti-down draft cowl  
Outer casing, cap and cowl painted Satin Black VHT

Pack Code Including flue kit — COR1012FLUEPACK  
Excluding flue kit — COR1012PACK

\*Please Note: Corten cabinet comes as a flat pack and requires assembly. Also, natural weathering is needed to achieve a rusted patina. Refer to installation manual for assembly instructions, clearances to combustibles, and weathering process of corten panels.

## As a sign of our commitment to quality, all new Masport fire boxes come with generous warranties.

Masport warranties our fire boxes, under normal use, to be free from defects in materials or workmanship (from the date of purchase)\*:

- Catalytic ULEB Wood Fires - 20 years
- Non-Catalytic ULEB Wood Fires - 15 years
- LEB Wood Fires - 10 years
- Outdoor Wood Fires - 5 years

This applies to only the firebox and excludes operational consumables, such as bricks, baffles and air bars etc.

Masport holds operational spare parts for up to 15 years for Low emission burners and up to 20 years for ULEBs, from the last date of manufacture. This gives you peace of mind and knowledge that you can service your wood fire over its lifetime. This is the advantage of buying New Zealand made.

## Installation

When installed in the correct manner as shown in the Masport Heating Installation Manual (supplied with the fire), your fire will provide a cleaner and more energy efficient warmth. Likewise, your outdoor fire will provide an impressive focal point in your back yard for many years of entertainment with friends & family. Masport Heating recommends that all installation work be carried out by an installer who has completed the NZHHA certification programme. We recommend that your Masport Fire is installed with an approved Masport flue kit.

Glen Dimplex New Zealand Ltd PO Box 58473, Botany, Auckland

Glen Dimplex New Zealand Ltd's policy is one of continuous development. We reserve the right to change size and specifications without notice. For confirmation of Masport Heating product details please refer to [www.masportheating.co.nz](http://www.masportheating.co.nz). Please refer to the installation and operation instructions before having your Masport Wood Fire installed. A full set of these instructions is supplied with each fire.
